INDEX

JANUARY 1993 TO DECEMBER 1993

AEROSOL CAN RECYCLING
Recycling aerosol cans is safe, p. 36
ALUMINUM CAN RECYCLING
Aluminum can recycling up in 1992, p. 13
Reynolds metals established record recycling totals in 1992, p. 22
Aluminum can recycling recovers and continues to increase, p 29
ALUMINUM FOIL RECYCLING
Foil laminates can be recycled, p. 4
Aluminum can recovered from foil laminates, p. 53
"Great Balls of Foil" contests recycle nearly 25 tons of aluminum foil, p. 54
AUSTRIA
Lenzing has joined with Lustro Plastics Co. to recycle PET and PETG sheet scrap, p. 24
The Austrian government has new law that will require a reduction in disposal of plastic wastes by 80% by 2000, p. 48
24 Austrian waste management companies are setting up nationwide collection and disposal system, p. 56
C. A. Geiner & Sohne of Auern has developed a process for using mixed post-consumer plastic wastes to produce hollow profiles, p. 63
AUTOMOBILE RECYCLING
Ten million tons of iron and steel are recycled annually from junked cars, p. 13
Automotive material recycling growing in the U.S., p. 57

BELGIUM
Belgium considering tax on containers of beer, soft drinks and sparkling water, p. 7
Ravago Plastics installing facility to recycle 11 million pounds per year of HDPE bottles., p. 56

CANADA
In 1992 Canadians Diverted 20% of their packaging wastes from landfills, p. 18
Manitoba plans province-wide recycling system, p. 94
CONSTRUCTION AND DEMOLITION WASTES
Recycling construction and demolition wastes, p. 30
CORRUGATED BOARD RECYCLING
CURBSIDE COLLECTION
New York City businesses must recycle, p. 84
Some New England communities are charged twice for recycling, p. 94

DEGRADABLE PLASTICS
Degradable plastics demand to grow nearly 17% annually through 1997, p. 27

ENGINEERING PLASTICS RECYCLING
A new recycler of engineering plastics, p. 83
EUROPE—GENERAL
Europe appears to be ahead of the U.S. in the recycling of fluorescent light tubes, p. 55
European environmental ministers failed to reach agreement on commission's proposed packaging and packaging waste regulations, p. 63

TECHNOMIC PUBLISHING CO., INC.

EUROPE—PLASTICS RECYCLING
PET bottle recycling is gradually increasing in Europe, p. 16
The British Department of Industry is urging the European plastic recyclers to agree on a good practice code, p. 16

FRANCE—GENERAL
Sotralentz has designed plastic film covers containing asphalt and gravel, for erosion control, p. 8
Mallez Imprimeurs is now offering "co-recyclable" labels, p. 24
Sarp Industrie is considering building a facility to recycle 2,000 tonnes of batteries a year, p. 31
Germany has been flooding Europe with packaging wastes, p. 56
Eco-Emballages has selected projects to recycle packaging wastes, p. 72
Placoplatre recycles gypsum wastes, p. 72
New company formed to dispose of waste products collected in pharmacies, p. 96
Electricite De France to construct MRF, p. 96

FRANCE—METAL
The French Minister of Environment is preparing a decree to recycle wastes from all electrical appliances, p. 7
Rechinery Rhenalu has been collecting used aluminum cans (UBC) from "Carrefour" supermarkets, p. 8
Metallgesellschaft will start up two new metal recycling facilities in the north of France, p. 16
Sollac introduced a new steel can with a 30% weight reduction, p. 56
Tiru has installed a unit to isolate steel recovered from municipal solid wastes after magnetic separation, p. 87

FRANCE—PAPER
La Chapelle Darblay installed blue bins throughout Paris to collect old newspapers and magazines, p. 31

FRANCE—PLASTICS RECYCLING
Lacerm has patented new low-cost biodegradable plastic, p. 16
Valorplast will gather plastic wastes from communities and ensure recycling, p. 24
Cabot Plastics is investing $2.6 million in a plastics recycling facility in Andance, France, p. 31
Cabot Plastics will install plastic recycling facility near Lyon, p. 72
Flo-Pack has recovered and recycled 60,000 tonnes of EPS, p. 87

GERMANY—AUTO RECYCLING
Ordinance passed that imposes the cost of disposing of used autos on the manufacturer, p. 64

GERMANY—GENERAL
RWE Entsorgung of Essen is constructing a pilot plant to recycle aseptic cartons, p. 23
DSD will increase fees to collect packaging wastes, p. 32
Ag UPR processed 600 tonnes of waste in their pilot unit in 1992, p. 32
Wuerzburg plant now recycles automotive oil filters, p. 39
The European community continue to complain about packaging wastes from Germany that are flooding Europe, p. 39
The German Government has reversed its hard-line plastics recycling stand and will now allow incineration or dumping, p. 55
Between 25 and 50 new waste-to-energy plants will have to be built in Germany, p. 64
Browning-Ferris Industries purchasing holdings in Otto Waste Industries, p. 80
The Constitutional Court in Karlsruhe refused to add landfill and incineration options to Germany's packaging law, p. 88
German Zeppelin Metallwerke and Texaco have developed technology for recovering and recycling industrial solvents, p. 88
Germany revamps the DSD system, p. 88
German Minister of Environment is considering modifying current recycling laws for packaging wastes, p. 95

GERMANY—GLASS
DSD is offering collected glass for reprocessing free of charge, p. 23

GERMANY—METAL
Robert Bosch of Stuttgart now accepts used electrical appliances, p. 39
Daimler Benz AG and Mitsubishi to recycle metal parts from automobiles, p. 95

GERMANY—PAPER
PWA Industriopapier GmbH constructed a 35,000 ton-per-year plant to recycle aseptic cartons, p. 7
First effects of the Töpfer ordinance are now appearing in Germany, p. 23
Germany had a surplus of 1.14 million m.t. of waste paper in 1992, p. 55
Germany recovered 50% of its postconsumer paper in 1992, p. 80

GERMANY—PLASTICS RECYCLING
Real GmbH converts some 2.2 million pounds per year of mixed plastics into plastic lumber, p. 7
Volkswagon AG is installing noise barrier shielding made from polyurethane wastes, p. 7
The Nordica Ski Boot makers is using its polyurethane wastes to make soles for new boots, p. 7
Plant produces sheet-molding compound and bulk-molding compound with 10–20% recycled content, p. 15
Bayer has developed process for recycling used CDs, p. 15
Hoechst has started up its facility to recycle plasticized PVC film, p. 15
Siemens Nixdorf has started up facility to recycle discarded computer housings, p. 15
BASF has launched a pilot program to collect and reprocess videocassettes, p. 16
In 1992 75,000 m.t. of plastic wastes were collected in Germany, p. 23
Otto Beteiligungs- und Verwaltungs- GmbH is adding automated sorting to its new generation of recycling plants, p. 48
Duales System Deutschland estimates that it will collect about 900 million pounds of waste plastics in 1993, p. 64

Incineration of plastic waste yet to occur, capacity not available, p. 72
Current plastic recycling capacity in Germany is only 124,000 tonnes, p. 72
Aral AG to collect HDPE oil containers at all of its 720 service stations, p. 79
New recycling plant starting up in Neumunster, p. 79
Klockner Pentaplast GmbH recycles PVC credit cards into 3–5 mil thick colored PVC film, p. 88
Veka has commissioned a new facility to recycle PVC scrap recovered from window frames, p. 88

GLASS RECYCLING
New glass recycling capacity to be added, p. 5
Glass recycling up, p. 29
Minnesota requires recycling of fluorescent lamps, p. 69

GLASS CONTAINER RECYCLING—INDUSTRY STRUCTURE
CRInc becomes principal U.S. supplier of cullet to vitro, p. 14
Allwaste adds new glass container beneficiation capacity, p. 37

HDPE RECYCLING—FOOD CONTAINERS
Recycling HDPE and PET moving into food and beverage containers, p. 9

HDPE RECYCLING—INDUSTRY STRUCTURE
Some plastics recyclers "throw in the towel", p. 65

HDPE RECYCLING—NON-FOOD BOTTLES
Procter & Gamble introduces a 100% recycled content Ultra Downy bottle, p. 1
Envirecycle recycles HDPE containers used for pesticides, oil, and printing inks, p. 44

ITALY
Ineco installed a 2,200 lb/hr plastics bottle sorting line, p. 8
Replastic is providing recycled polyethylene film to Sarajevo, p. 8
A 33-million pound-per-year facility to recycle polyamide is being installed at Novalis Fibre's Cesano-Moderno complex in Italy, p. 24
Cabot investing in a laboratory devoted to research on compounds derived from recycled resins, p. 24
Italy processes about 1.5 billion pounds of plastic scrap annually, p. 40
Rhone Poulenc and Snia Fibres reported their Novalis JV will recycle more than 15,000 tonnes per year of polyamide-6 fiber waste, p. 40
Replastic is to reclaim PVC bottle scrap, p. 47
NRT will be installing new Autosort® automated sorting machine at a plastics recycling facility in Milan, p. 48

LANDFILL COSTS
Disposal costs will increase sharply in 1993, p. 22
Small landfills will not have to comply with new regulations until April, p. 86

LEGISLATION
Design of green products requires very cautious regulation, p. 6
Oregon may include plastic food packages in its demand for recycled-content containers, p. 6
Mandatory recycled content bills putting pressure on the plastic industry, p. 14
Recycled-content laws poised to spread to other states, p. 38
Florida adopts the advanced disposal fee, p. 47
Landfill bans becoming popular, p. 54
States are moving ahead with recycled-content legislation, p. 61
Food and cosmetic plastic containers are not exempted from the California recycled-content law, p. 70
Federal government moves to promote paper recycling, p. 85
The plastic bottle code is expected to change, p. 91

MEDICAL WASTES
Recycling plastic medical wastes, p. 21
Browning-Ferris teams up with hospitals in waste removal project, p. 70

MERCURY RECYCLING
Thermostat manufacturers announce pilot mercury-thermostat recycling program, p. 95

MRFs
Combining MRFs with waste to energy facilities, p. 93

MUNICIPAL SOLID WASTES
Municipal solid waste generation to reach 227 million pounds by 1997, p. 22

NETHERLANDS
Reko is doubling its capacity to recycle PET and HDPE bottles, p. 40
The Dutch Ministry for Environmental Control was unable to demonstrate that PVC should be avoided for environmental reasons, p. 56
Waven makes pipe and packaging items using recycled HDPE and LDPE, p. 63
The Board of Appeals confirmed VROM was unable to demonstrate that plastic PVC should be avoided for environmental reasons, p. 80
"Removal Contribution" imposed on auto buyers, p. 87
The Dutch Standard Organization approved coextruded pipe designs with up to 60% PVC regrind, p. 87
Dutch organization of pipe producers recovers scrap vinyl pipe from construction sites, p. 95

NORWAY
A facility to reclaim HDPE and LDPE containers is expected to start up in 1994, p. 87

OIL RECYCLING
Recycled motor oil, p. 84

PACKAGING RECYCLING
Grocery packaging discards drop dramatically, p. 20

PAPERBOARD RECYCLING
Caraustar Industries, Inc. acquires Manchester Board and Paper Company, Inc., p. 46
Recyclable waxed paperboard, p. 69
Georgia Pacific has developed a recyclable "waxed" corrugated container, p. 83
Old corrugated container recycling rate continues

upward, p. 83
PAPER RECYCLING—GENERAL
Task force formed to promote environmentally preferable paper products, p. 62
Yellow Page directories are recyclable, p. 68
Consumers prefer recycled paper packaging, p. 92
PAPER RECYCLING—INDUSTRY STRUCTURE
New paper recycling mill proposed for the Radford Army Ammunition plant, p. 52
PAPER RECYCLING TECHNOLOGY
Recycled paper standards under review by NRC, p. 37
Low-density adhesives more easily removed in paper recycling, p. 52
Ricoh develops technology allowing copier paper to be recycled in the office, p. 69
PAPER WASTES—MARKETS
Non-paper and paperboard markets for waste paper, p. 13
The paper industry on its way to meet its recycling goal, p. 28
Office paper recycling "on a roll", p. 45
"Brown Bag America" program kicked off, p. 46
Office waste paper may not keep up with demand, p. 53
PET FILM RECYCLING
Dupont improves its PET film recycling, p. 35
PET—RECYCLED FOOD GRADE
Recycled HDPE and PET moving into food and beverage containers, p. 9
Food contact bottles from post-consumer PET, p. 33
New food-contact multilayer recycled-content PET bottle goes commercial, p. 66
PET-RECYCLED—MARKETS
PET bottle recycling continues to grow, p. 27
A new fleece fabric made from recycled PET, p. 28
ITW recycling PET into strapping and LDPE into carrier rings, p. 43
New applications for recycled PET, p. 67
Coca-Cola purchases office supplies with recycled content, p. 68
PET RECYCLING—INDUSTRY STRUCTURE
Pure Tech is now one of the major PET recyclers, p. 2
A PET sheet producer diversifies into the recycling market, p. 3
A new PET recycler and a new PET recycling process, p. 12
California gets a PET recycler, p. 26
Wellman makes another acquisition and adds a new division, p. 34
Hoechst Celanese suspends operation of the PET bottle recycling facility, p. 41
Pure Tech continues its buying spree, p. 42
Pure Tech is growing and growing, p. 51
Some plastics recyclers "throw in the towel", p. 65
The plastics recycling industry structure continues in flux, p. 81
PLASTICS RECYCLING—GENERAL
Recycled plastics demand to increase to 3.1 billion pounds by 1996, p. 3
Rubbermaid developing new partnership with its suppliers of recycled plastics, p. 11
Plastics recycling will continue to grow, p. 19
Recycling RETEC drawing a big response, p. 31
Procter & Gamble Company seeks to join the recyclers' group after leaving the American Plastics Council, p. 44
Plastics recycling rate up—but a long way to go, p. 49
Novel process converts plastics into oil, 60
NRC and SPI agree to improve plastic resin identification code, p. 60
A new plastics recovery facility for North Carolina, p. 61
Recycling plastic durables—a challenge that will be met, p. 67
Eastman joins in research to find new uses for recycled plastics, p. 91
PLASTICS RECYCLING—INDUSTRY STRUCTURE
Plastics recyclers continue to forward integrate, p. 25
PLASTICS RECYCLING—TECHNOLOGY
John Brown develops new continuous flow wash process for recycling systems, p. 76
PLASTICS SORTING
New systems for automated sorting of plastics in bottle and granulate form, p. 73
PLASTIC WOOD
TriMax plastic lumber licenses its technology to two companies, p. 66
The plastic lumber business is alive and well, p. 89
Wire and cable reels from commingled plastics, p. 90
Some struggling plastic lumber suppliers are becoming more hopeful, p. 90
POLYETHYLENE BAG RECYCLING
Plastic trash bags with recycled content—a mandated trend?, p. 76
POLYETHYLENE FILM RECYCLING
Mulch film recycling, p. 59
A new polyethylene film with recycled content, p. 77
POLYETHYLENE RECYCLING—INDUSTRY STRUCTURE
Graham recycling adds a third line to recycle HDPE, p. 43
The plastics recycling industry structure continues in flux, p. 81
POLYPROPYLENE RECYCLING
Himont preparing to sell recycled-content polypropylene compounds, p. 28
POLYSTYRENE RECYCLING
Reusing polystyrene packaging "peanuts", p. 75
POLYURETHANE RECYCLING
Polyurethane recycling moving ahead, p. 50
PVC RECYCLING
PVC sheet with recycled content, p. 75

RECYCLED-CONTENT PRODUCTS
Recycled-content products save money, p. 54
Shoes from "transformed trash", p. 71
Companies push to buy more recycled-content products, p. 77
Green business grows rapidly despite slow economy, p. 79
Clinton gives funding to foster recycling technology, p. 85
California's "Market Watch" eyes

conservation-minded manufacturers, p. 93
RECYCLING AND THE ECONOMY
Recycling benefits the economy, p. 94
REINFORCED PLASTICS RECYCLING
Additives can improve properties of recycled glass reinforced plastics, p. 12
REUSABLE PLASTIC CONTAINERS
The North American version of the refillable plastic soft drink bottle, p. 18
REUSE
Companies are moving to reusable transport packaging, p. 86
REVERSE VENDING
Another entree in reverse vending, p. 62

SOFT DRINK CONTAINER RECYCLING
Soft drink industry recycling rate hits record high, p. 36
SOURCE REDUCTION
Source reduction—packagers are getting the message, p. 17
Anheuser-Busch introduces its source-reduced beer can, p. 69
The pouch is "in", p. 91
SPAIN
An 11 million pound-per-year plant has been installed to recycle agricultural film, p. 8
Some 100 plastic recycling companies now operate in Spain, p. 16
Spain imports over 500,000 m.t. of waste paper annually, p. 64
Reyde-Alvarez has installed blow molding capacity, p. 87
Revinil formed to recycle PVC bottles, p. 87
STEEL CAN RECYCLING
A shipbuilder recycles steel paint and aerosol cans, p. 21
Steel can recycling approaches 41%, p. 30
SWEDEN
Sweden proposing new legislation, p. 39
SWITZERLAND
Switzerland recovers 54% of all household batteries, p. 15
Buhler AG has introduced an automated system for sorting all plastic bottles by plastic type, p. 15
In Switzerland residents use special bags for their non-recyclable wastes that cost about .90 per bag, p. 64
Poly Recycling will be able to process PET, polyethylene and polypropylene, p. 8
THERMOSET PLASTIC RECYCLING
Recycled thermoset resins are used in new autos, p. 11
Rogers Corp. installs a line to recycle phenolic wastes, p. 60
TIRE RECYCLING
Scrap tire recycling is up, p. 4
New crumb tire rubber plant to open this year, p. 13
Use of old tires in highway construction judged uneconomical, p. 38
Rubberized asphalt program delayed, p. 84

UNITED KINGDOM—GENERAL
The British Consortium of the Packaging Chain (COPAC) developed plan to buy back sorted used packaging, p. 8
The U.K. is the only EC country that permits co-disposal of industrial and domestic waste, p. 23
United Glass and Rockware Glass of the U.K. form British Glass Recycling Co. Ltd., p. 23
A new program to collect paper wastes has been launched in the U.K., p. 39
Alcan has opened its ninth UBC collection center in Stobe, England, p. 47
Minister of Environment has asked industry to present plan to recycle 50–75% packaging wastes by 2000, p. 71
UNITED KINGDOM—PLASTICS
PCI predicts that the U.K. market for recycled PET will increase to 125 million pounds by 1997, p. 23
Monoplas Industries recycles 40 tonnes per month of post-consumer EPS, p. 32
The plastics collection program in Sheffield is now 3 years old, p. 32
Blow Molding Controls develops on-line system to test returned refillable PET bottles for leaks, p. 47
BP Chemicals plans to install demonstration plant to convert commingled plastic wastes into hydrocarbon, p. 55
Lin-Pac's plastic recycling facility operates at 80% of capacity, p. 71
More than 242 million pounds of plastic are being reclaimed annually in the U.K., p. 80
Results from BP Chemicals' demonstration plant to thermally crack commingled plastic wastes, p. 87

VIDEOCASSETTE RECYCLING
The green videocassette, p. 10
